# REVIEW OF ECONOMIC AND FINANCIAL DEVELOPMENTS 

## DOMESTIC ECONOMIC DEVELOPMENTS

## Overview

Preliminary indications are that economic activity for the fourth quarter of 2014 was supported by an improving tourism performance, alongside steady foreign led construction investments. However, the pace of growth was not sufficient to facilitate a reduction in the unemployment rate, while the sharp fall in global oil prices slowed consumer inflation to a negligible level.

Provisional data showed that the Government's overall deficit narrowed over the second quarter of FY2014/15, as a tax-related increase in total revenue overshadowed the modest rise in spending. Financing of the deficit was sourced primarily from the domestic market in the form of Government bonds, while external borrowings were mainly earmarked for the acquisition of defense vessels.

In the monetary sector, bank liquidity remained robust, while external reserves declined modestly, reflecting the seasonal pick-up in foreign currency demand during the closing months of the year. Banks' credit quality indicators improved following the series of measures taken by the Government to strengthen the capital position of Bank of The Bahamas (BOB). However, the sector's profitability levels were adversely impacted by higher expenses-inclusive of bad debt provisions.

On the external side, the estimated current account deficit widened, as an increase in foreign-investment related non-oil imports contributed to a deterioration in the merchandise trade deficit, and higher construction services outflows reduced the services account surplus. The capital and financial account surplus declined modestly, as a reduction in net foreign direct investment inflows overshadowed an increase in foreign investment-linked private loan financing.

## Fiscal Operations

## Overview

The fiscal outturn for the second quarter of FY2014/15 showed the overall deficit narrowing by $5.0 \%$ ( $\$ 5.6$ million) to $\$ 106.8$ million. The tax-led growth in total revenue, of $3.7 \%$ ( $\$ 13.3$ million) to $\$ 369.5$ million, outpaced the marginal rise in aggregate expenditure of $1.6 \%$ ( $\$ 7.7$ million) to $\$ 476.2$ million.

## Revenue

Tax receipts-at 83.7\% of the total-grew by 9.9\% ( $\$ 27.7$ million) to $\$ 309.1$ million. International trade and transaction taxes were higher by 7.5\% ( $\$ 11.1$ million) at $\$ 158.2$ million, benefitting from a consumer import driven rise in excise taxes, of $27.3 \%$ ( $\$ 14.9$ million). Buoyed by the rebound in

tourism sector activity, departure taxes firmed by $41.1 \%$ ( $\$ 9.7$ million) to $\$ 33.2$ million and selective taxes

Government Revenue By Source
(Oct. - Dec.)

|  | FY13/14 |  | FY14/15 |  |

| Sales of Govt. Property | 0.1 | 0.0 | 0.4 | 0.1 |
| Income | 41.4 | 11.6 | 25.3 | 6.8 |
| Other Non-Tax Rev. | -- | -- | -- | -- |
| Capital Revenue | -- | -- | -- | -- |
| Grants | 0.1 | 0.0 | -- | -- |
| Less:Refunds | 1.9 | 0.5 | 0.8 | 0.2 |
| Total | 356.2 | $\mathbf{1 0 0 . 0}$ | $\mathbf{3 6 9 . 5}$ | $\mathbf{1 0 0 . 0}$ | on tourism-related services more than doubled to $\$ 12.5$ million. In addition, non-trade related stamp taxes and business \& professional licence fees advanced by $7.0 \%$ ( $\$ 2.6$ million) to $\$ 39.2$ million and by $8.9 \%$ ( $\$ 1.2$ million) to $\$ 14.4$ million, respectively. Smaller increases, of less than $\$ 1.0$ million, were recorded for property ( $\$ 0.7$ million) and motor vehicle ( $\$ 0.2$ million) taxes and, in a modest offset, collections of other "unallocated" taxes declined by $45.7 \%$ ( $\$ 6.5$ million) to $\$ 7.7$ million.

Non-tax revenue, at $16.3 \%$ of total receipts, contracted by $19.2 \%$ ( $\$ 14.3$ million) to $\$ 60.3$ million. A key factor was the timing-related fall in income from other miscellaneous sources, by $\$ 16.8$ million (40.0\%) to $\$ 24.5$ million, from the prior year's outcome which included dividend payments from a major utility company. Providing some offset, collections of fines, forfeits \& administrative fees
were up by $\$ 1.5$ million ( $4.4 \%$ ) to $\$ 34.7$ million and revenue from the sale of Government property, by $\$ 0.3$ million to $\$ 0.4$ million.

## Expenditure

Growth in total spending was primarily associated with a $4.8 \%$ ( $\$ 19.3$ million) expansion in current outlays, to $\$ 422.5$ million, and a $5.7 \%$ ( $\$ 1.1$ million) rise in net lending to public corporations to $\$ 20.3$ million. In contrast, capital expenditures decreased by $27.4 \%$ ( $\$ 12.7$ million) to $\$ 33.5$ million. On a proportional basis, recurrent expenditure accounted for $88.7 \%$ of aggregate spending, capital outlays, $7.0 \%$ and net lending to public corporations, 4.3\%.
By economic classification, the rise in recurrent outlays was led by a $14.9 \%$ ( $\$ 24.7$ million) boost in transfer payments to $\$ 190.2$ million, owing mainly to a $24.4 \%$ ( $\$ 27.0$ million) hike in subsidies \& other transfers, to $\$ 137.8$ million, which outstripped the $4.3 \%$ ( $\$ 2.3$ million) broad-based falloff in interest payments. In terms of the components, higher spending was posted for subsidies ( $\$ 27.0$ million), transfers to non-profit institutions ( $\$ 1.7$ million), non-financial public enterprises ( $\$ 1.0$ million) and public corporations ( $\$ 0.3$ million), with declines for transfers to households ( $\$ 1.6$ million) and abroad ( $\$ 1.4$ million). Consumption expenditures decreased by $2.3 \%$ ( $\$ 5.4$ million) to $\$ 232.3$ million, as the $\$ 12.5$ million falloff in purchases of goods \& services negated the $\$ 7.2$ million advance in personal emoluments.
On a functional basis, current spending was fuelled by higher outlays for health-care, of $15.3 \%$ ( $\$ 10.5$ million) to $\$ 79.3$ million, and for economic services, of $31.1 \%$ ( $\$ 12.5$ million) to $\$ 52.9$ million-the latter associated with gains in disbursements for tourism ( $\$ 9.4$ million), public works \& water supply ( $\$ 3.0$ million) and transportation ( $\$ 1.2$ million). In contrast, reduced expenditures were noted for general public services, by $0.5 \%$ ( $\$ 0.6$ million) to $\$ 120.0$ million, social benefits \& services, by $1.9 \%$ ( $\$ 0.7$ million) to $\$ 35.4$ million and community \& social services, by $6.9 \%$ ( $\$ 0.2$ million) to $\$ 3.3$ million.
The decline in capital expenditure was largely explained by a reduction in economic service outlays, of $37.8 \%$ ( $\$ 12.3$ million) to $\$ 20.2$ million-almost entirely linked to public works \& water supply projects. In addition, lower spending was recorded for education (by $\$ 2.4$ million to $\$ 2.9$ million), other community \&
social services (by $\$ 1.6$ million to $\$ 0.03$ million) and health (by $\$ 0.6$ million to $\$ 0.06$ million). Conversely, expenditures for general public service increased by almost two-thirds ( $\$ 3.6$ million) to $\$ 9.1$ million, but rose marginally for defense and housing, by $\$ 0.5$ million and $\$ 0.1$ million, to $\$ 0.9$ million and $\$ 0.3$ million, respectively.

## Financing and the National Debt

Budgetary financing for the review quarter was obtained largely from domestic sources, in the form of Government bonds ( $\$ 150.0$ million) -half of which related to a new type of debt security, termed Bahamas Government Stock (BGS), and short-term loans \& advances ( $\$ 66.0$ million). External funding included $\$ 110.3$ million in loan financing, the bulk of which was secured to facilitate Government's purchase of several new Defense Force vessels (\$103.4 million). Debt repayment aggregated \$71.5 million, with $92.3 \%$ absorbed by Bahamian dollar obligations.

As a result of these developments, the Direct Charge on the Government advanced by $\$ 253.9$ million (4.8\%) over the quarter and by $\$ 616.2$ million ( $12.4 \%$ ) year-on-year, to $\$ 5,599.7$ million at end-December, 2014. Bahamian dollar debt represented the majority ( $71.6 \%$ ) of the total, with the largest share held by commercial banks (39.6\%), followed by other private and institutional investors (29.5\%), public corporations (16.6\%), the Central Bank (14.1\%) and Other Local Financial Institutions (0.2\%).

By instrument, Government bonds constituted the bulk of domestic currency debt, at 75.5\%, bearing an average maturity of 10.2 years -slightly below the 10.7 years recorded in the previous period. Treasury bills and loans \& advances accounted for smaller shares, of $14.3 \%$ and $10.1 \%$, respectively.

During the fourth quarter, Government's contingent liabilities were reduced by $\$ 3.2$ million ( $0.5 \%$ ) to $\$ 648.1$ million. Consequently, the National Debt-which includes contingent liabilities-expanded by $\$ 250.7$ million ( $4.2 \%$ ) over the quarter and by $\$ 663.1$ million (11.9\%) relative to last year, to $\$ 6,247.8$ million at end-December, 2014.

## Public Sector Foreign Currency Debt

Public sector foreign currency debt grew by $1.4 \%$ ( $\$ 33.7$ million) to $\$ 2,421.2$ million over the preceding quarter and by $13.2 \%$ ( $\$ 282.0$ million) relative to the same period a year earlier, as net drawings of $\$ 114.0$ million surpassed amortization payments of $\$ 78.7$ million. The Government's component-at $65.7 \%$ of the total-increased by $2.4 \%$ ( $\$ 37.9$ million) to $\$ 1,590.1$ million, in contrast to a slight $0.5 \%$ ( $\$ 4.3$ million) reduction in the public corporations' obligations, to $\$ 831.2$ million.

Compared to the same period of 2013, total public sector debt service payments advanced by $43.1 \%$ ( $\$ 34.8$ million) to $\$ 115.6$ million. Government's refinancing activities led to a three-fold ( $\$ 64.9$ million) hike in debt service outlays, to $\$ 96.9$ million, as amortization payments expanded by $\$ 65.8$ million to $\$ 71.5$ million and eclipsed the $\$ 1.0$ million decline in interest expenses to $\$ 25.4$ million. In contrast, the public corporations' segment contracted by $\$ 30.1$ million to $\$ 18.7$ million, due to reductions in both interest charges and amortization payments, of $\$ 2.5$ million to $\$ 11.6$ million and $\$ 27.5$ million to $\$ 7.1$ million, respectively.
At end-December, the sector's debt service ratio-inclusive of refinanced debt-advanced to $15.3 \%$ from $9.8 \%$, year-on-year, and the Government's debt service to revenue ratio firmed to $26.2 \%$ from $9.0 \%$ last year. On a net basis, both ratios declined to $6.6 \%$ and $8.4 \%$, respectively.

Disaggregated by creditor profile, private capital markets accounted for the largest holdings of foreign currency debt, at $37.2 \%$, followed by other miscellaneous institutions ( $35.3 \%$ ), commercial banks ( $13.1 \%$ ), multilateral institutions (11.6\%) and bilateral companies (2.8\%). The outstanding foreign currency debt
carried an average maturity of 12.8 years, compared with 13.4 years in 2013. United States dollar debt obligations accounted for the dominant portion ( $88.6 \%$ ), while euros and the Chinese Yuan comprised the remaining $8.5 \%$ and $2.9 \%$, respectively.

## Real Sector

## ToURISM

Preliminary evidence suggests an improved tourism sector performance over the review quarter, as the recovery in group bookings and sustained economic growth in several of the key source markets translated into gains in the high value-added stopover visitor segment.

The hosting of a significant sporting event, combined with increased travelers during the Thanksgiving holiday period, buoyed air traffic by $8.2 \%$ to 0.3 million-reversing the $2.5 \%$ contraction in the comparative period of 2013. In contrast, sea arrivals, which dominated at $81.5 \%$ of the total, declined by $0.3 \%$ to 1.3 million, following the year-earlier $9.6 \%$ boost. As a consequence, growth in the visitor count slowed

Visitor Arrivals
 markedly, to $1.2 \%$ for 1.6 million, from the $7.3 \%$ expansion in 2013.

By major ports of call, visitors to New Providence fell by $6.1 \%$ to 0.8 million, compared to 2013's $2.5 \%$ growth, as the $9.4 \%$ reduction in sea visitors surpassed the $4.4 \%$ rebound in the air segment. Gains in the Family Island market slackened to 6.1\%, for a total of 0.6 million arrivals, from a $31.3 \%$ hike a year earlier, due to tapered growth in both the air ( $5.8 \%$ ) and sea ( $6.1 \%$ ) components. The introduction of new non-stop flight service from eight (8) US cities, and the opening of a mid-size resort in April, supported a $53.6 \%$ surge in air traffic to Grand Bahama, alongside a $22.8 \%$ improvement in visitors by sea. The combined effect was a $26.9 \%$ recovery in
visitors, to 0.2 million, from 2013's 22.3\% contraction.

## Construction

Construction sector output continued to be driven by the multi-billion dollar Baha Mar hotel project, alongside sustained activity in a number of disbursed smaller-scale foreign investment projects.

Domestic private sector activity showed modest signs of recovery during the review period, notwithstanding the high levels of consumer indebtedness and more enhanced bank lending practices. Total mortgage disbursement for new construction and repairs-as reported by commercial banks, insurance companies and the
 Bahamas Mortgage Corporation-rose by $7.7 \%$ to $\$ 23.1$ million, vis-à-vis the year-earlier $12.3 \%$ contraction. Underlying this outturn, residential mortgages firmed by $5.8 \%$ to $\$ 22.7$ million, a reversal from 2013's
$11.8 \%$ reduction, while the commercial segment recovered by $\$ 0.4$ million, after no disbursements in the comparative period last year.

Despite the short-term improvement in domestic construction activity, conditions in the housing sector are expected to remain subdued over an extended period, as total mortgage commitments for new construction and repairs-a forward looking indicator-declined in number, by $42.5 \%$ to eighty-four (84), and in value, by $56.7 \%$ to $\$ 10.1$ million. The decrease was concentrated in the residential segment, with both the number and value of commitments lower by sixty-three (63) and $\$ 13.7$ million, to eighty-three (83) and $\$ 9.6$ million, respectively. In contrast, there was one (1) commercial loan approval valued at $\$ 0.5$ million, compared to no commitments in the same period of 2013.

In terms of financing, interest rates on commercial mortgages narrowed by 30 basis points to $8.2 \%$, while the average rate on residential loans fell by 10 basis points to $8.0 \%$.

## Employment

Given the narrowness in economic growth, as well as the seasonal increase in the labour force, due to new school graduates, the unemployment rate deteriorated by 1.4 percentage points to $15.7 \%$ over the six months to November, 2014. Specifically, the number of jobless persons grew by 3,245 (11.5\%) to 31,540, reflecting a 3,705 (1.9\%) expansion in the labour force to 201,040. This also included a 6.6\% decline in discouraged workers, to 4,560, which eclipsed the gain in the number of employed persons, by 460 (0.3\%), to 169,500.

Disaggregated by major job centers, the unemployment rate for New Providence—at 74.9\% of the labour force-grew by 1.0 percentage point to $16.0 \%$, while Grand Bahama's rate advanced by 3.9 percentage points to $18.6 \%$. Both the jobless rate for females and males firmed, by 2.0 percentage points to $17.3 \%$ and 60 basis points to $14.1 \%$, respectively.

## PRICES

Reflecting the pass-through effects of the significant decline in international crude oil prices, domestic inflation-as measured by changes in the average Retail Price Index for The Bahamastapered over the fourth quarter, by 59 basis points to $0.25 \%$, in comparison to the same period a year earlier. After registering increases of $3.79 \%$ and $1.94 \%$ in the prior period, average price declines were recorded for miscellaneous goods \& services and transport by $2.33 \%$ and $1.65 \%$, respectively, while communication and food \& non-alcoholic beverages remained relatively unchanged, following gains of 1.61\% and 1.23\%, respectively, in 2013. Similarly, average inflation rates slowed for alcoholic beverages, tobacco \& narcotics, restaurant \& hotels, health and recreation \& culture, to $3.88 \%, 2.44 \%, 1.51 \%$ and $1.49 \%$, from $6.20 \%, 3.34 \%, 2.29 \%$ and, $4.56 \%$, respectively, in

| Retail Price Index <br> (Annual \% Changes; December) |  |  |  |  |  |

| Rec., \& Culture | 22.73 | 105.5 | 1.9 | 107.1 | -5.0 |
| Education | 30.05 | 109.4 | 1.6 | 114.3 | 17.7 |
| Restaurant \& Hotels | 38.24 | 109.2 | 4.6 | 111.9 | 6.0 |
| Misc. Goods \& Sves. | 140.5 | 105.6 | 2.9 | 103.1 | -5.7 |
| ALL ITEMS | 1000 | 106.5 | 3.3 | 106.7 | -2.3 | the prior year. In contrast, the average cost of clothing \& footwear and housing, water, gas, electricity \& other fuels rose by $4.60 \%$ and $0.37 \%$, vis-à-vis

respective year-earlier contractions of $3.70 \%$ and $1.40 \%$. Average price gains also advanced for furnishing, household equipment, \& routine household maintenance and education, by 1.76 and 1.58 percentage points to $2.15 \%$ and $4.51 \%$, respectively.

In a continuation of recent trends, domestic energy costs sustained their downward trajectory during the fourth quarter. The average cost of both gasoline and diesel fell by $11.3 \%$ to $\$ 4.85$ per gallon and $7.9 \%$ to $\$ 4.67$ per gallon, with respective annual decreases of $9.9 \%$ and $6.2 \%$. In contrast, the Bahamas Electricity Corporation's fuel charge rose by $1.6 \%$ to $\$ 25.97$ per kilowatt hour ( kWh ) over the quarter, and by a higher 9.8\% on an annual basis.

## MONEY, CREDIT AND INTEREST RATES

## OVERVIEW

Money and credit developments for the final quarter of 2014 continued to reflect the mild level of consumer demand, which kept private sector credit constrained and liquidity levels elevated. Banks' credit quality indicators improved, as the implementation of several initiatives by the Government to restore the capital position of BOB to prudential levels, led to a significant reduction in that institution's nonperforming loan portfolio. Although real sector earnings improved, seasonal increases in foreign currency demand prompted a decline in external reserves. Bank's performance indicators reveal a reduction in overall profitability, due to a combination of lower net interest earnings and higher provisions for bad debts, despite the widening in the interest rate spread between loans and deposits.

## LIQUIDITY

Banks' net free cash reserves expanded by $\$ 19.4$ million (4.1\%) to $\$ 488.0$ million, a reversal from 2013's $\$ 62.1$ million (18.0\%)

Bank Liquidity
 contraction, and represented a higher $8.0 \%$ of deposit liabilities. Growth in the broader surplus liquid assets, which include holdings of Government securities, slackened to $\$ 3.0$ million ( $0.3 \%$ ) from a yearearlier $\$ 24.5$ million (2.2\%). At $\$ 1,156.8$ million, these assets exceeded the statutory minimum by $112.8 \%$ vis-à-vis 115.1\% in 2013.

## Deposits and Money

The reduction in the overall money supply ( M 3 ) tapered to $\$ 50.9$ million ( $0.8 \%$ ) from $\$ 112.7$ million (1.8\%) last year, for an end-December balance of $\$ 6,389.1$ million. In terms of the components, growth in narrow money (M1) accelerated to $\$ 227.5$ million (12.9\%) from a mere $\$ 2.0$ million ( $0.1 \%$ ) in 2013 , as reporting reclassifications by one entity contributed to a $\$ 216.2$ million (14.0\%) expansion in demand deposits, to reverse the prior period's $\$ 4.4$ million ( $0.3 \%$ ) contraction. Currency in circulation also expanded at a higher rate of $\$ 11.2$ million (5.1\%), relative to $\$ 6.4$ million (3.1\%) a year ago. Following a $\$ 71.4$ million (1.2\%) decline in 2013, broad money ( M 2 ) fell further by $\$ 11.3$ million ( $0.2 \%$ ), as savings deposits decreased by $\$ 91.3$ million ( $7.9 \%$ ), vis-à-vis a year-earlier increase of $\$ 24.5$ million ( $2.2 \%$ ), and the fall in fixed deposits
broadened to $\$ 147.5$ million (4.5\%) from $\$ 97.9$ million ( $2.9 \%$ ). Further, the reduction in foreign currency deposits moderated to $\$ 39.6$ million (15.0\%) from $\$ 41.3$ million (13.1\%).

As a proportion of the overall money stock, Bahamian dollar fixed deposits comprised the largest share, at $48.5 \%$, followed by demand (27.6\%) and savings (16.7\%) balances. Currency in active circulation and foreign currency deposits represented much smaller shares, of $3.7 \%$ and $3.5 \%$, respectively.

## Domestic Credit

The quarterly contraction in domestic credit was higher at $\$ 153.5$ million (1.7\%) from $\$ 3.3$ million in 2013, and was primarily explained by the Government's use of proceeds from its external loan to repay short-term commercial bank bridging finance. As a consequence, banks' foreign currency claims declined sharply, by \$145.8 million (19.7\%), in contrast to last year's $\$ 115.6$ million (16.0\%) build-up, while the reduction in the dominant Bahamian dollar component narrowed to $\$ 7.6$ million (0 .1\%) from $\$ 118.9$ million (1.4\%).

After remaining relatively flat in 2013, banks' net credit to the Government fell by \$55.1 million (2.7\%) over the review quarter, and the decline in claims on the
 rest of the public sector almost doubled to $\$ 47.1$ million (11.2\%). Reflecting the impact of the transfer of a significant portion of the non-performing commercial loan portfolio from BOB to the newly created Government Special Purpose Vehicle (SPV) called Resolve Corporation of The Bahamas and, to a lesser extent, constrained domestic demand conditions, private sector credit contracted by $\$ 51.3$ million (0.8\%) to reverse last year's $\$ 24.6$ million (0.4\%) gain.

Distribution of Bank Credit By Sector
(End-December)

| (End-December) |  |  |  |  |
| :--- | ---: | ---: | ---: | ---: |
|  | $\mathbf{2 0 1 3}$ |  | $\mathbf{2 0 1 4}$ |  |
|  | B\$M | $\underline{\%}$ | $\underline{B \$ M}$ | $\underline{\%}$ |
|  |  |  |  |  |
| Agriculture | 11.2 | 0.2 | 11.0 | 0.2 |
| Fisheries | 7.0 | 0.1 | 8.3 | 0.1 |
| Mining \& Quarry | 2.5 | 0.0 | 2.3 | 0.0 |
| Manufacturing | 52.5 | 0.7 | 37.3 | 0.5 |
| Distribution | 214.3 | 3.0 | 187.6 | 2.7 |
| Tourism | 47.7 | 0.7 | 35.8 | 0.5 |
| Enter. \& Catering | 79.7 | 1.1 | 77.1 | 1.1 |
| Transport | 36.3 | 0.5 | 45.8 | 0.7 |
| Construction | 450.6 | 6.3 | 363.7 | 5.2 |
| Government | 253.6 | 3.6 | 352.1 | 5.1 |
| Public Corps. | 329.8 | 4.6 | 251.3 | 3.6 |
| Private Financial | 22.2 | 0.3 | 19.6 | 0.3 |
| Prof. \& Other Ser. | 83.0 | 1.2 | 57.7 | 0.8 |
| Personal | $5,244.6$ | 73.7 | $5,261.0$ | 75.6 |
| Miscellaneous | 283.8 | 4.0 | 243.8 | 3.5 |
| TOTAL | $\mathbf{7 , 1 1 8 . 8}$ | $\mathbf{1 0 0 . 0}$ | $\mathbf{6 , 9 5 4 . 4}$ | $\mathbf{1 0 0 . 0}$ |

Personal loans, at $75.7 \%$ of total private sector credit, fell marginally by $\$ 0.7$ million ( $0.01 \%$ ), relative to a $\$ 65.1$ million (1.3\%) expansion in 2013. Underlying this outturn were reductions in both residential mortgages and overdrafts, of $\$ 12.2$ million ( $0.4 \%$ ) and $\$ 4.0$ million ( $6.6 \%$ ), respectively, which negated the $\$ 15.4$ million ( $0.7 \%$ ) advance in consumer credit.

A further breakdown of consumer credit showed loans for miscellaneous purposes advancing by $\$ 22.5$ million, while smaller gains were recorded for credit cards, private cars, home improvements and furnishings \& domestic appliances, of $\$ 3.9$ million, $\$ 3.0$ million, $\$ 0.5$ million and $\$ 0.3$ million, respectively. In a partial offset, net repayments were registered for land purchases ( $\$ 6.5$ million), debt consolidation (\$4.7 million), travel (\$2.2 million) and education ( $\$ 1.2$ million), while increases of under $\$ 1.0$ million were posted for commercial vehicles and medical.

Among the remaining private sector loan categories, reduced net liabilities were recorded for construction ( $\$ 69.2$ million), distribution ( $\$ 24.7$ million), professional \& other services ( $\$ 22.4$ million), miscellaneous ( $\$ 15.1$ million), manufacturing ( $\$ 12.2$ million) and fisheries ( $\$ 4.7$ million). In a slight offset, borrowings for transportation purposes rose by $\$ 2.1$ million.

## Mortgages

Data reported by banks, insurance companies and the Bahamas Mortgage Corporation showed the outstanding stock of mortgages moved lower by $\$ 28.2$ million ( $0.9 \%$ ) to $\$ 3,269.8$ million, extending the previous year's $\$ 1.0$ million ( $0.03 \%$ ) reduction. Residential mortgages-which comprised the majority ( $94.1 \%$ ) of the total-declined by a further $\$ 8.0$ million ( $0.3 \%$ ) to $\$ 3,076.2$ million, and the commercial component fell by $\$ 20.2$ million ( $9.4 \%$ ) to $\$ 193.6$ million, to reverse the year-earlier $\$ 6.8$ million ( $3.3 \%$ ) gain. At end-December, the largest share of outstanding mortgages was held by domestic banks (88.9\%), followed by insurance companies (6.0\%) and the Bahamas Mortgage Corporation (5.1\%).

## The Central Bank

Following a contraction of $\$ 34.5$ million (6.6\%) in the final quarter of 2013, the Central Bank's net claim on the Government rebounded by $\$ 39.4$ million ( $8.2 \%$ ) to $\$ 520.9$ million, reflecting increased holdings of medium-term Government securities. The Bank's net liability to the rest of the public sector also grew by $\$ 4.4$ million ( $25.3 \%$ ) to $\$ 21.9$ million, in contrast to last year's $\$ 11.9$ million ( $66.2 \%$ ) contraction. Balances held for commercial banks firmed by $\$ 13.4$ million ( $1.8 \%$ ) to $\$ 744.7$ million, compared with a $\$ 16.3$ million (2.5\%) reduction last year.

External reserves decreased by $\$ 14.9$ million (1.9\%) to $\$ 787.7$ million, a turnaround from the year-earlier $\$ 72.4$ million (10.8\%) gain that included the impact of the Government's bridging external bond financing. In the underlying transactions, the Bank's foreign currency transactions reversed to a net sale of $\$ 18.5$ million, vis-à-vis a $\$ 35.5$ million net purchase a year earlier, with the net intake from the Government moving sharply lower to $\$ 45.8$ million from $\$ 248.1$ million in 2013. In a modest offset, the improving performance of the real sector supported a turnaround in transactions with commercial banks, to a net purchase of $\$ 48.9$ million, from last year's net sale of $\$ 70.3$ million. Further, the net sale to the public corporations-mainly related to fuel payments-slowed by $\$ 29.0$ million to $\$ 113.2$ million.

External Reserves
(B\$M)

At end-2014, the stock of external reserves was equivalent to an estimated 14.9 weeks of non-oil merchandise imports, compared with 15.4 weeks a year earlier. After adjusting for the $50 \%$ statutory requirement on the Bank's Bahamian dollar liabilities, "usable reserves" fell by $\$ 16.4$ million (5.9\%) to \$260.7 million.

## DOMESTIC BANKS

Bank's credit outcomes were dominated by movements in their net exposure to the Government, which fell by $\$ 94.5$ million ( $5.9 \%$ ), in contrast to 2013 's growth of $\$ 34.6$ million ( $2.4 \%$ ). Claims on the private sector also contracted, by $\$ 51.3$ million ( $0.8 \%$ ), to reverse last year's $\$ 24.6$ million ( $0.4 \%$ ) advance, and was
principally explained by the transfer of $\$ 100$ million in non-performing loans from BOB to the SPV in October. The rest of the public sector continued to reduce its liabilities to banks, with the decline almost doubling to $\$ 47.1$ million ( $11.2 \%$ ). In addition, the repayment of short-term borrowings lowered banks' net foreign currency liabilities, by $\$ 124.3$ million ( $19.8 \%$ ), following on a $\$ 174.6$ million ( $33.5 \%$ ) hike last year.

Banks' deposit liabilities contracted by $\$ 65.3$ million (1.1\%) to $\$ 6,131.0$ million-although below last year's $\$ 107.5$ million (1.7\%) falloff. Public corporations' balances declined by a lower $\$ 10.5$ million (3.0\%), compared to a $\$ 72.5$ million ( $18.0 \%$ ) reduction in 2013. Meanwhile, the decrease in private sector deposits accelerated to $\$ 54.8$ million ( $0.9 \%$ ) from $\$ 35.0$ million ( $0.6 \%$ ) a year earlier.

By end-December, the majority of deposit liabilities (96.4\%) were denominated in Bahamian dollars, with the US dollar and other miscellaneous currencies accounting for the remaining $3.5 \%$ and $0.1 \%$, respectively. By type, in Bahamian dollars, private individuals represented the largest share (51.7\%), followed by business firms ( $30.0 \%$ ), private financial institutions (5.5\%), public corporations (4.3\%), "other" entities (4.2\%), Government (3.4\%) and public financial institutions (0.9\%).

By contractual classifications, fixed deposits comprised the bulk (52.7\%) of banks' deposits, followed by demand (29.9\%) and savings (17.4\%) balances. The majority of accounts (88.5\%) held Bahamian dollar balances of less than $\$ 10,000$ and constituted $5.9 \%$ of the total value. Account balances between $\$ 10,000$ and $\$ 50,000$ represented $7.6 \%$ of the aggregate number and $10.6 \%$ of the value, while individual balances exceeding $\$ 50,000$ accounted for a mere $3.9 \%$ of the aggregate number, but a dominant $83.5 \%$ of the overall value.

## Credit Quality

Banks' credit quality indicators improved during the review quarter, due solely to the transfer of a sizable component of BOB's non-performing commercial loans to the SPV. Specifically, total private sector arrears contracted on a quarterly basis, by $\$ 92.7$ million ( $6.7 \%$ ) to $\$ 1,287.3$ million and by 1.2 percentage points to 21.4\% of total loans.

Loan Arrears as \% of Total Loans

The reduction in total delinquencies was concentrated in the commercial segment, which declined by $\$ 104.0$ million ( $28.3 \%$ ) to $\$ 263.5$ million, and by 7.4 percentage points to $29.4 \%$ of total loans. Consumer loan arrears were marginally lower, by $\$ 0.4$ million ( $0.1 \%$ ) at $\$ 312.0$ million over the quarter, for an 8 basis point decrease in the corresponding loan ratio, to $13.9 \%$. In contrast, the dominant mortgage component-at $55.3 \%$ of arrears-moved higher by $\$ 11.6$ million ( $1.7 \%$ ) to $\$ 711.7$ million, elevating the attendant ratio by 51 basis points to $24.7 \%$.

Based on average age of delinquencies, nonperforming loans-arrears in excess of 90 days and on which banks stopped accruing interestcontracted by $\$ 79.5$ million ( $7.6 \%$ ) to $\$ 972.1$ million, and by 1.0 percentage points to $16.1 \%$ of total loans. The short term (31-90 days) segment was also lower, by $\$ 13.3$ million ( $4.0 \%$ ) at $\$ 315.2$ million, and by 13 basis points to $5.2 \%$ of total loans.

Reflecting the significant reduction in BOB's non-performing loan portfolio, overall provisions in the banking system decreased by $\$ 15.8$ million (3.1\%) to $\$ 501.2$ million -although representing a relatively stable $7.9 \%$ of total loans. In contrast, both the ratio of provisions to non-performing loans and arrears trended upwards, by 2.4 and 1.5 percentage points, to $51.6 \%$ and $38.9 \%$, respectively.

## bank Profitability

Banks' profitability indicators contracted during the fourth quarter of 2014, as a narrowing in the net interest margin and increased provisioning for bad debts contributed to a $\$ 4.5$ million ( $25.7 \%$ ) decrease in net income to $\$ 13.0$ million-albeit below the year-earlier $\$ 22.1$ million ( $55.7 \%$ ) falloff.

The net interest margin fell by $\$ 4.2$ million (3.1\%) to $\$ 132.0$ million, owing to an $\$ 8.1$ million (5.0\%) decrease in interest income, which eclipsed the $\$ 3.9$ million ( $14.3 \%$ ) contraction in interest expense. Providing some offset, commission \& foreign exchange fee income rose marginally, by $\$ 0.6$ million ( $9.5 \%$ ) to $\$ 6.5$ million, culminating in a $\$ 3.6$ million ( $2.5 \%$ ) reduction in the gross earnings margin to $\$ 138.4$ million.

Total operating outlays declined slightly by $\$ 0.7$ million ( $0.8 \%$ ) to $\$ 92.5$ million, primarily explained by reductions in staffing and occupancy costs, of $\$ 9.8$ million ( $18.6 \%$ ) and $\$ 0.09$ million ( $1.1 \%$ ), which offset the $\$ 9.1$ million ( $27.6 \%$ ) expansion in "miscellaneous" operating expenses to $\$ 42.0$ million. Consequently, the net earnings margin was lower by $\$ 2.9$ million $(5.9 \%)$ at $\$ 45.9$ million. Losses on noncore operating activities grew by $\$ 1.6$ million (5.2\%) to $\$ 32.9$ million, attributed to a $\$ 3.6$ million (6.6\%) rise in bad debt provisions to $\$ 57.1$ million, which offset the $\$ 1.7$ million (31.4\%) decline in depreciation costs to $\$ 3.8$ million and a $\$ 0.2$ million ( $0.7 \%$ ) uptick in fee-based income to $\$ 28.0$ million.

Given these developments, most of the banks' profitability ratios-as measured relative to average assets-trended downwards during the quarter. In comparison to the previous year, the gross earnings margin ratio narrowed by 15 basis points to $5.67 \%$, comprising a 17 basis point reduction in the net interest margin ratio to $5.40 \%$ and a 3 basis point rise in the commission \& foreign exchange income ratio to $0.27 \%$. Similarly, the operating cost ratio moved lower by 3 basis points to $3.79 \%$, based on a tapering in both the net income and net earnings margin ratios, by 19 and 12 basis points, to $0.53 \%$ and $1.88 \%$, respectively.

## Interest Rates

During the review quarter, banks' weighted average interest rate spread on loans and deposits widened by 20 basis points to $10.9 \%$, as the average lending rate edged up by 4 basis points to $12.11 \%$, while the corresponding deposit rate fell by 16 basis points to $1.21 \%$.

| Banking Sector Interest Rates <br> Period Average (\%) |  |  |  |
| :--- | :---: | :---: | :---: |
|  | Qtr. IV | Qtr. III | Qtr. IV |
|  | $\underline{\mathbf{2 0 1 3}}$ | $\underline{\mathbf{2 0 1 4}}$ | $\underline{\mathbf{2 0 1 4}}$ |
|  |  |  |  |
| Deposit Rates | 0.30 | 0.28 | 0.30 |
| Demand Deposits |  | 0.76 | 0.86 |
| Savings Deposits | 0.94 |  |  |
| Fixed Deposits |  |  |  |
| Up to 3 months | 1.12 | 1.19 | 0.99 |
| Up to 6 months | 0.97 | 1.26 | 0.96 |
| Up to 12 months | 1.87 | 1.70 | 1.50 |
| Over 12 months | 1.92 | 1.44 | 1.29 |
| Weighted Avg Deposit | $\mathbf{1 . 4 3}$ | $\mathbf{1 . 3 7}$ | $\mathbf{1 . 2 1}$ |
|  |  |  |  |
| Lending Rates |  |  |  |
| Residential mortgages | 7.26 | 7.07 | 6.94 |
| Commercial mortgages | 8.81 | 7.67 | 8.20 |
| Consumer loans | 13.63 | 14.22 | 14.03 |
| Other Local Loans | 7.86 | 6.96 | 8.50 |
| Overdrafts | 9.02 | 9.86 | 9.78 |
| Weighted Avg Loan Rate | $\mathbf{1 1 . 3 6}$ | $\mathbf{1 2 . 0 7}$ | $\mathbf{1 2 . 1 1}$ |

Reflecting the buoyant liquidity conditions, the average interest rates on fixed maturities declined to a range of $0.99 \%-1.50 \%$ from 1.19\% - 1.70\% in the prior period. Conversely, the average savings and demand deposit rates firmed by 10 and 2 basis points, to $0.86 \%$ and $0.30 \%$, respectively.

Average lending rates were broadly lower, with the cost of borrowing for consumer loans, residential mortgages and overdrafts down by 19,13 , and 8 basis points, to $14.03 \%, 6.94 \%$, and $9.78 \%$, respectively. In contrast, the average commercial mortgage rate firmed by 53 basis points to $8.20 \%$.

In terms of other key rates, the average 90-day Treasury bill rate rose by 10 basis points to $0.59 \%$, while the respective Central Bank's Discount Rate and commercial banks' Prime Rate steadied at $4.50 \%$ and $4.75 \%$.

## Capital Markets Developments

The Bahamas International Securities Exchange (BISX) registered some gains over the review period. Reflecting a significant share issue by an oil company, the volume of shares traded on the exchange advanced by $23.4 \%$ to 1.8 million, although the associated value fell by $20.7 \%$ to $\$ 4.5$ million, while market capitalization firmed by $5.3 \%$ to $\$ 3.5$ billion. In addition, the BISX All Share Index moved higher by $5.2 \%$ to $1,659.3$ points by end-December, extending the year-earlier increase of $4.4 \%$. Buoyed by the listing of two (2) new preference share issues by a telecommunications company during the fourth quarter, the number of securities quoted on the Exchange increased by 2 to 29, and consisted of 20 common shares, 4 debt tranches and 5 preference shares.

## International Trade and Payments

Preliminary data on external sector developments for the fourth quarter of 2014 showed that the estimated current account deficit widened by $\$ 121.6$ million ( $22.9 \%$ ) to $\$ 652.3$ million, relative to the comparative 2013 period. Underlying this outcome was an increase in the merchandise trade deficit, related mainly to higher capital-based imports, while a surge in foreign investment-related construction service outflows led to a narrowing in the services account surplus. The capital and financial account surplus fell by an estimated $\$ 45.4$ million ( $11.2 \%$ ) to $\$ 358.8$ million, owing to a falloff in net foreign direct investment inflows, which offset the increase in private loan financing.

The estimated merchandise trade deficit expanded by $\$ 101.2$ million ( $17.6 \%$ ) to $\$ 689.7$ million, with net payments for non-oil imports, significantly linked to foreign investment activity, firming by $\$ 111.7$ million $(23.0 \%)$ to $\$ 596.8$ million. However, fuel outlays contracted by $\$ 33.4$ million ( $19.1 \%$ ) to $\$ 141.7$ million, reflecting the pass-through effects of the recent decline in international oil prices. Correspondingly, lower per barrel average prices were recorded for propane ( $34.7 \%$ to $\$ 50.14$ ), jet fuel ( $53.7 \%$ to $\$ 88.35$ ), motor gas ( $17.2 \%$ to $\$ 101.90$ ) and gas oil ( $16.6 \%$ to $\$ 98.35$ ). Conversely, average prices for aviation gas moved up by $4.6 \%$ to $\$ 86.00$ per barrel.

The services account surplus narrowed by $\$ 10.4$ million ( $6.3 \%$ ) to $\$ 154.8$ million, although inclusive of a surge in net outflows for foreign investment-related construction services, of $\$ 59.8$ million ( $45.3 \%$ ) to $\$ 191.7$ million and a $\$ 20.0$ million ( $36.1 \%$ ) hike in net outlays for transportation services to $\$ 75.3$ million. In
addition, the net inflow from offshore companies' local expenses decreased by $\$ 13.1$ million (22.4\%) to $\$ 45.3$ million. Providing some offset, net travel receipts firmed by $\$ 35.6$ million ( $8.6 \%$ ) to $\$ 447.1$ million, in line with the growth in stopover visitors, while net inflows for Government services rose by $\$ 1.0$ million ( $16.6 \%$ ) to $\$ 7.0$ million. Other net "miscellaneous" service payments contracted by $\$ 26.2$ million ( $35.7 \%$ ) to $\$ 47.2$ million and net remittances for insurance services were reduced by $\$ 18.9$ million ( $40.9 \%$ ) to $\$ 27.2$ million. Payments for royalty \& license fees declined marginally, by $\$ 0.8$ million ( $20.3 \%$ ), to $\$ 3.2$ million.

The deficit on the income account widened by $\$ 35.7$ million ( $37.7 \%$ ) to $\$ 130.3$ million, vis-àvis the same period in 2013, partly due to a \$24.2 million (26.5\%) advance in net investment outflows to $\$ 115.3$ million. This outturn reflected a $\$ 29.4$ million ( $42.8 \%$ ) rise in private companies' interest and dividend payments, to $\$ 98.1$ million; commercial banks' transactions were reversed to a net outflow of $\$ 8.3$ million from a $\$ 6.1$ million net receipt, while non-bank entities net payments rose by $\$ 15.0$ million ( $20.1 \%$ ) to $\$ 89.8$ million. In a modest offset, the net outflow for official public sector-related transactions decreased by $\$ 5.2$ million ( $23.2 \%$ ) to $\$ 17.2$ million, with the Bank's investment income unchanged at $\$ 3.9$ million. Additionally, net labour income outlays increased more than four-fold, to $\$ 15.0$ million, mainly associated with construction service payments to non-residents.

Net current transfers were reversed to a $\$ 12.8$ million net receipt from a similar net outflow a year earlier, largely explained by an $\$ 18.2$ million ( $56.0 \%$ ) decline in workers' remittances. In addition, net Government receipts expanded by $\$ 6.5$ million ( $27.6 \%$ ) to $\$ 29.9$ million.

The falloff in the capital and financial account surplus reflected a reversal in direct investment transactions to a slight net outflow of $\$ 0.7$ million from a net receipt of $\$ 147.3$ million a year earlier. In particular, net equity inflows contracted sharply by $\$ 136.3$ million to a mere $\$ 4.9$ million, while property-related transactions recorded a net outflow of $\$ 5.6$ million, vis-à-vis a net inflow of $\$ 6.1$ million last year. Providing some offset, "other miscellaneous" investment inflows surged by $\$ 92.0$ million to $\$ 365.5$ million, as private sector loan-based financing registered a more than three-fold expansion to $\$ 384.0$ million from $\$ 106.5$ million in the prior year. Among the other components, a $\$ 102.3$ million advance in public sector net capital inflows was negated by a reversal in domestic banks' net short-term transactions, to a $\$ 124.3$ million outflow, as Government utilized loan proceeds to repay the short-term foreign currency ship bridging loan facility. Net portfolio investment outflows declined by more than one-half to $\$ 5.2$ million, as net equity securities fell by $\$ 3.0$ million to $\$ 5.2$ million, and there were no debt security purchases during the review period, compared to $\$ 6.3$ million in 2013.
As a result of these developments, and after adjusting for net errors and omissions, the overall balance, which corresponds to the change in the Central Bank's external reserves, registered a deficit of \$14.9 million, a turnaround from the $\$ 72.4$ million surplus in the same period of 2013.

## INTERNATIONAL ECONOMIC DEVELOPMENTS

Indications are that global economic growth was sustained at a modest pace during the fourth quarter, as the United States market continued to strengthen, output growth in Asia moderated and Europe continued to emerge from its prolonged recession. As excess crude oil supply, together with dampened demand, lowered global fuel costs, inflationary conditions were mild. Against this backdrop, most of the leading central banks either maintained or augmented their expansionary monetary policy measures-with the exception of the Federal Reserve, which ended its "quantitative easing" programme.

In the United States, gains in personal consumption expenditure, private inventory investment and exports led to a $2.2 \%$ expansion in output, although tempered from the sharp $5.0 \%$ rise in the third quarter. Similarly, the United Kingdom's real GDP grew by $0.4 \%$, amid growth in agriculture, forestry and fishing, production and services, after a $0.6 \%$ rate recorded in the previous three-month period. In the euro area, real output firmed to $0.3 \%$ from $0.2 \%$ in the third quarter, due to increased consumption spending, higher fixed capital formation and exports. Within Asia, China's annual real GDP growth stabilised at a fifteen year low of $7.4 \%$ during the fourth quarter, as the Government continued measures to boost the level of domestic consumption and reduce the reliance on exports and investment. Gains in household and Government consumption shifted Japan from its six-month long recession, as the economy expanded by an annualized $1.5 \%$, after a $2.6 \%$ contraction in the prior three-month period.

Reflecting the improving economic conditions in most of the major economies, unemployment rates fell over the quarter. In the United States, non-farm payrolls expanded by 973,000 and the jobless rate decreased by 30 basis points to $5.6 \%$ at end-December-the lowest rate since June 2008. Similarly, the United Kingdom's unemployment rate narrowed by 30 basis points to $5.7 \%$, as the number of employed persons rose by 103,000 during the three-month period. Jobless rates among the euro zone's members continued to fall from their elevated levels, reducing the region's unemployment rate by 10 basis points to a three-year low of $11.4 \%$ at end-December. In Asia, Japan's jobless rate declined by 20 basis points to $3.4 \%$, while China's rate steadied at $4.1 \%$.

Amid a sharp decline in international crude oil prices, inflationary pressures eased in most of the major economies over the review period. Accretions to average consumer price gains in the United States slowed by 0.9 of a percentage point to an annualized rate of $0.8 \%$, amid declines in transportation costs, while a fall-off in motor fuel prices contributed to in the United Kingdom's average inflation rate decreasing to a mere $0.5 \%$ from $1.2 \%$ in the preceding period. Deflationary conditions prevailed in Europe, as overall price levels contracted by $0.2 \%$ during the twelve-month period ending December, compared to a $0.3 \%$ uptick in the third quarter. Lower average price gains across several price indices caused Japan's annual inflation rate to taper by 80 basis points to $2.4 \%$ at end-December, over the prior quarter; however, average price gains in China steadied at $1.5 \%$ over the three-month period, as food, clothing and health care costs continued to rise.

Given the improving economic fundamentals in the United States economy, along with expectations that the country's central bank would raise interest rates in the near-term, the U.S. dollar appreciated relative to most of the other major currencies over the review period. The dollar surged by $9.1 \%$ against the Japanese Yen, to $¥ 119.68$, and firmed more moderately versus the euro, by $4.4 \%$ to $€ 0.82$. The dollar also advanced vis-à-vis the Swiss Franc and British Pound, by $4.1 \%$ each, to CHFO.99 and $£ 0.64$, respectively, and recorded modest gains against the Canadian dollar (3.8\% to CAD \$1.16) and Chinese Yuan (1.1\% to CNY6.21).

Developments in the major markets were mixed, reflecting mainly domestic factors. In particular, China's SE Composite surged by $36.8 \%$ to a four-year high, reflecting a cut in the central bank's benchmark rate and the implementation of measures aimed at further deregulating the financial market. Japan's Nikkei 225
strengthened by 7.9\%, buoyed by significant corporate earnings. In the United States, the Dow Jones Industrial Average (DIJA) and the S\&P 500 indices gained by $4.6 \%$ and $4.1 \%$, respectively, as the positive macroeconomic reports generally exceeded investors' expectations. In Europe, Germany's DAX advanced by $3.5 \%$; however, France's CAC 40 and the United Kingdom's FTSE 100 declined, by $3.3 \%$ and $0.9 \%$, respectively.

Quarterly commodity market outcomes were dominated by the precipitous fall in crude oil prices, by 40.6\% to US\$57.33 per barrel, as stockpiles continued to be boosted by the increase in US shale gas production. In the precious metals market, as investors' appetite for riskier assets increased, the cost of silver and gold contracted by $7.4 \%$ and $2.0 \%$ to $\$ 15.71$ and $\$ 1,208.16$ per ounce, respectively.

Despite the improving economic conditions, most of the major central banks either maintained or enhanced their highly accommodative monetary policy measures, to support the economic recovery. The European Central Bank left its key policy rates unchanged and also decided to implement a $€ 1$ trillion "quantitative easing" programme, while the Bank of England maintained its policy rate at $0.5 \%$ and left its asset purchase programme at $£ 375$ billion. In Asia, the People’s Bank of China provided additional stimulus to the economy, lowering the benchmark one-year lending and deposit rates, by 40 and 25 basis points, to $5.60 \%$ and $2.75 \%$, respectively, and the Bank of Japan sustained its $¥ 80$ trillion "quantitative easing" programme. In contrast, buoyed by improving job market indicators and higher capacity utilization, the United States' Federal Reserve ended its extraordinary asset purchase programme in October, and left its key interest rate at the historic low of $0.00 \%-0.25 \%$.

Amid the appreciating dollar and weak economic growth within its trading partners, the United States' trade deficit deteriorated by $\$ 4.9$ billion to $\$ 128.2$ billion during the fourth quarter, as exports were reduced by $\$ 3.0$ billion ( $0.5 \%$ ), while imports rose by $\$ 2.0$ billion ( $0.3 \%$ ). In contrast, the United Kingdom's trade deficit narrowed by $18.4 \%$ to $£ 7.1$ billion, as a $1.8 \%$ increase in exports countered the $0.4 \%$ rise in imports, while growth in both the goods (3.3\%) and services (6.0\%) accounts occasioned a fourth quarter $3.8 \%$ increase in the euro area's trade surplus, to $€ 84.3$ billion. In Japan, the trade deficit contracted by $20.1 \%$ ( $¥ 580.6$ billion) to $¥ 2,301.0$ billion, supported by an $8.1 \%$ expansion in mainly capital-based exports, which outpaced the $4.3 \%$ rise in imports. China's trade surplus strengthened by US\$21.4 billion (16.7\%) to US\$149.5 billion in the fourth quarter, as heightened demand from the United States, Europe and Southeast Asia led to an $\$ 11.0$ billion (1.7\%) increase in exports, combined with a $\$ 10.4$ billion (2.1\%) decline in mainly fuel-based imports.
