# Review of Economic and Financial Developments 

## Domestic Economic Developments

Indications are that domestic economic conditions were relatively flat during the fourth quarter of 2013, as the ongoing positive contribution from foreign-led construction investment activity was counterbalanced by weakness in the high value-added stopover component of the tourism market. With gains mostly in the construction sector, employment conditions improved slightly, while domestic inflation remained relatively benign, despite modest firming in international oil prices.

Based on provisional data for the second quarter of FY2013/14, the Government's overall deficit narrowed, as a combination of lower lending to the public corporations and capital outlays reduced aggregate expenditure, countering the falloff in overall revenues. Financing for the deficit was sourced primarily from the domestic market in foreign currency.

In the monetary sector, both bank liquidity and external reserves strengthened over the three-month period, bolstered by the Government's foreign currency borrowing activities. However, the persistence of high unemployment and subdued business conditions--which constrained borrowers' capacity to service their debtsresulted in a further deterioration in banks' asset quality indicators. Banks' overall profitability, however, increased in the three-months to September, due to declines in interest expense and bad debt provisions.

On the external side, the current account deficit widened in the fourth quarter, reflecting a deterioration in the merchandise trade deficit, associated with elevated outlays for construction services and reduced net inflows from tourism. The capital and financial account surplus stabilized over the review period, as an increase in project loan financing proceeds compensated for a reduction in direct investment inflows.

## Fiscal Operations

## Overview

Based on preliminary estimates for the second quarter of FY2013/14, the overall deficit narrowed by 10.4\% ( $\$ 13.0$ million) to $\$ 112.3$ million relative to the comparative period of FY2012/13. This outturn reflected a $5.0 \%$ ( $\$ 24.8$ million) contraction in aggregate spending to $\$ 468.5$ million, primarily linked to a significant reduction in net lending to public sector entities, which outweighed a $3.2 \%$ ( $\$ 11.8$ million) decrease in total revenue to $\$ 356.2$ million.

## Revenue

Tax receipts, at $79.0 \%$ of total collections, fell by $9.3 \%$ ( $\$ 29.0$ million) to $\$ 281.4$ million-due in large measure to a $46.7 \%$ ( $\$ 20.7$ million) reduction in departure taxes to $\$ 23.6$ million, back to trend levels, following last year's one-off receipt of arrears payments. In addition, a timing-related decline in foreign realty tax collections, reduced property taxes by $22.5 \%$ ( $\$ 11.0$ million) to $\$ 37.7$ million, and lower proceeds from hotel occupancy and gaming taxes explained the more than halving of selective taxes on services to $\$ 4.8$ million. International trade \& transaction taxes also decreased, by $3.0 \%$ ( $\$ 4.6$ million) to $\$ 147.1$ million, associated with declines in stamp taxes from imports ( $\$ 4.3$ million) and excise taxes ( $\$ 4.2$ million), which negated gains in export (\$2.1 million) and import (\$1.8 million) taxes. More muted decreases were posted for business and professional license fees ( $\$ 0.4$ million) and motor vehicle taxes ( $\$ 0.1$ million). In a partial offset, other "unallocated" tax receipts increased more than three-fold to $\$ 14.2$ million, while non-trade related stamp taxes grew by $16.0 \%$ ( $\$ 5.1$ million) to $\$ 36.7$ million.

Non-tax receipts-which constituted $21.0 \%$ of total revenue-expanded by $\$ 17.1$ million (29.6\%) to $\$ 74.7$ million. Income from other miscellaneous sources advanced by $\$ 17.6$ million to $\$ 41.3$ million, supported by increased dividend payments from a major utility, while
there were no receipts from public enterprises relative to $\$ 6.9$ million in FY2012/13. Proceeds from fines, forfeits and administration fees, at $44.5 \%$ of the total, moved higher by $\$ 6.4$ million ( $23.7 \%$ ) to $\$ 33.2$ million, with negligible revenue from the sale of Government property.

| Government Revenue By Source (Oct. - Dec.) |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | FY12/13 |  | FY13/14 |  |

| Total | 368.0 | 100.0 | 356.2 | 100.0 |

## Expenditure

The decline in overall spending was dominated by a marked contraction in net lending to public corporations, to $\$ 19.3$ million from a year-earlier $\$ 60.8$ million boost, which was primarily earmarked for aviation operations. Reflecting the winding down of a number of large infrastructure programmes, Government's capital outlays also fell, by $12.6 \%$ ( $\$ 6.7$ million) to $\$ 46.2$ million; however, current spending rose by $6.2 \%$ ( $\$ 23.5$ million) to $\$ 403.2$ million. By proportion, recurrent expenditure accounted for the majority ( $86.1 \%$ ) of total outlays, while capital spending and net lending comprised the remaining $9.8 \%$ and $4.1 \%$, respectively.

Based on economic classification, the growth in current expenditure was led by a $\$ 12.9$ million ( $8.5 \%$ ) rise in
transfer payments to $\$ 165.5$ million, due mainly to a $12.0 \%$ ( $\$ 11.9$ million) gain in subsidies \& other transfers to $\$ 110.8$ million. The latter included advances in subsidies ( $\$ 10.9$ million), transfers to households ( $\$ 6.5$ million) and transfers abroad ( $\$ 2.9$ million), which eclipsed reductions in transfers to public corporations ( $\$ 6.2$ million) and non-profit institutions ( $\$ 2.4$ million). The interest payment component, which absorbed $11.7 \%$ of aggregate outlays, firmed modestly by $1.8 \%$ ( $\$ 1.0$ million) to $\$ 54.7$ million. Consumption related spending rose by $6.2 \%$ ( $\$ 23.5$ million) to $\$ 403.2$ million, as both personal emoluments and purchases of goods \& services were higher, by $\$ 6.5$ million and $\$ 4.1$ million, respectively.

On a functional basis, current expenditure growth was associated with higher outlays for general administration, of $\$ 10.3$ million to $\$ 120.6$ million and health care, of $\$ 5.3$ million ( $8.4 \%$ ) to $\$ 68.7$ million. Spending for economic services also rose by $\$ 2.7$ million ( $7.1 \%$ ) to $\$ 40.3$ million, of which $\$ 1.9$ million was for public works \& water supply and $\$ 0.4$ million for transportation. Social benefits \& services, primarily for "miscellaneous" public assistance and old age, disability \& services, grew by $\$ 2.7$ million ( $8.0 \%$ ) to $\$ 36.1$ million, and education firmed by $3.4 \%$ ( $\$ 2.2$ million) to $\$ 66.2$ million. Conversely, reduced outlays were registered for other community \& social services, of $19.0 \%$ ( $\$ 0.8$ million) to $\$ 3.5$ million.

The contraction in capital spending was largely explained by a $15.0 \%$ ( $\$ 7.1$ million) reduction in spending on infrastructure developments, to $\$ 40.1$ million, reflecting the completion of several large-scale capital projects; and transfers to non-financial public enterprises were two-thirds lower at $\$ 0.1$ million. In a slight offset, transfers to public corporations were approximately doubled to $\$ 1.1$ million, while outlays for asset acquisitions rose marginally to $\$ 4.8$ million.

## Financing and the National Debt

Budgetary financing for the fourth quarter of 2013 was dominated by domestic foreign currency loans, totaling $\$ 125.0$ million, short-term local advances ( $\$ 39.0$ million) and Treasury bills ( $\$ 31.0$ million). External loan drawdowns amounted to $\$ 20.0$ million. Of the $\$ 131.5$ million absorbed by debt repayments, the bulk (95.7\%) went towards retiring local debt obligations.

As a consequence of these combined developments, the Direct Charge on the Government expanded by $\$ 83.7$ million ( $1.7 \%$ ) vis-à-vis the previous quarter, and by $\$ 576.1$ million (13.1\%), year-on-year, to $\$ 4,971.7$ million at end-December, 2013. Bahamian dollar debt represented $73.8 \%$ of the total and was held mainly by commercial banks (36.7\%), followed by private and institutional investors (29.6\%), public corporations ( $18.7 \%$ ), the Central Bank (14.8\%) and Other Local Financial Institutions ( $0.2 \%$ ). By type of instrument, Government securities constituted the largest share of domestic debt, at $80.5 \%$, bearing an average maturity of 11.1 years, with Treasury bills and loans \& advances accounting for smaller shares of $15.8 \%$ and $3.7 \%$, respectively.

During the review period, Government's guaranteed debt decreased by $\$ 15.5$ million ( $0.9 \%$ ) to $\$ 601.1$ million. As a result, the National Debt advanced by $1.4 \%$ ( $\$ 78.3$ million) relative to the previous quarter, and by $11.5 \%$ ( $\$ 573.8$ million) over the year, to $\$ 5,572.7$ million at endDecember, 2013.

## Public Sector Foreign Currency Debt

Public sector foreign currency debt rose by $5.4 \%$ ( $\$ 108.3$ million) to $\$ 2,127.3$ million over the prior quarter, and by $12.6 \%$ ( $\$ 238.5$ million) relative to the same period last year, as new drawings of $\$ 148.5$ million eclipsed amortization payments of $\$ 40.5$ million. Buoyed by internal foreign currency borrowings, the Government's outstanding liabilities, which accounted for the major share ( $61.2 \%$ ) of the total, increased by $12.0 \%$ ( $\$ 139.5$ million) to $\$ 1,301.0$ million over the quarter; however, the public corporations' debt stock declined by $3.6 \%$ (\$31.3 million) to $\$ 826.3$ million.

Compared to the same period last year, total public sector debt service payments firmed by $53.7 \%$ ( $\$ 28.3$ million) to $\$ 80.8$ million, as scheduled payments by an airport operator more than doubled the public corporations' portion to $\$ 48.9$ million. In contrast, the Government's portion was modestly lower, by $0.3 \%$ ( $\$ 0.1$ million) to $\$ 32.0$ million-of which $\$ 26.3$ million represented interest payments. By end-December, Government's debt service to revenue ratio was 30 basis points higher at $9.0 \%$, and the debt service ratio firmed by 4.2 percentage points to $10.6 \%$, year-on-year.

By credit profile, the largest holders of foreign currency debt were non-resident investors (35.1\%), followed by private capital markets (28.2\%), commercial banks (21.2\%), multilateral institutions (12.8\%) and bilateral companies ( $2.7 \%$ ). The average age of the outstanding foreign currency debt narrowed to 13.4 years from 15.4 years in 2012, and the bulk ( $92.5 \%$ ) of the debt was denominated in US Dollars, with euros and the Chinese Yuan accounting for the remaining $4.8 \%$ and $2.7 \%$, respectively.

## Real Sector

## Tourism

Output in the tourism sector continued to be constrained by weakness in the high value-added stopover segment of the market, amid increased competition from other regional destinations, a modest reduction in room inventory and the tempered recovery in several key source markets. Total visitor arrivals strengthened by $7.3 \%$ to 1.6 million, outpacing the modest year-earlier
$0.7 \%$ increase, with gains dominated by an extended $9.6 \%$ hike in sea traffic from last year's $1.1 \%$ expansion. However, the contraction in longer-stay air passengers broadened to $2.5 \%$ from $0.7 \%$ in the comparative 2012 period.

On a destination basis, visitor arrivals to New Providence grew at a slightly lower rate of $2.5 \%$ to 0.9 million, from the prior year's $2.9 \%$, as a $4.5 \%$ hike in sea arrivals contrasted with the $3.3 \%$ decrease in the air component. Buoyed by the introduction of a new cruise ship service to a northern island resort, visitors to the Family Islands recovered by $31.3 \%$, from 2012's $7.0 \%$ falloff. This was led by a $33.7 \%$ upturn in sea arrivals, alongside a $7.8 \%$ gain in the air segment. In contrast, Grand Bahama's respective declines in air and sea traffic, of $12.5 \%$ and $23.6 \%$, resulted in a $22.3 \%$ reduction in total arrivals to 0.2 million, relative to a $9.4 \%$ expansion last year.

Weakness in the stopover segment of the market spilled over into hotel earnings which, according to provisional data from a sample of large hotels in New Providence and Paradise Island, showed total room revenues contracting by $6.5 \%$ for the review quarter. Based on a reduction in available rooms at a few properties and the
temporary closure of one hotel, the average occupancy rate fell by 4.2 percentage points to $53.1 \%$, offsetting the $2.5 \%$ rise in average daily room rate to $\$ 217.0$.

## Construction

During the quarter, construction sector activity continued to be underpinned by the multi-billion dollar Baha Mar project and a number of smaller scale commercial developments in both New Providence and the Family Islands. In contrast, the domestic segment of the market remained subdued, reflecting the challenges faced by consumers in meeting their existing loan obligations, amid the elevated unemployment levels and conservative bank lending practices.

Mortgage Commitments:New Construction and Repairs

Total mortgage disbursements for new construction and repairs-as reported by commercial banks, insurance companies and the Bahamas Mortgage Corpora-tion-fell by $12.3 \%$ to $\$ 21.4$ million, extending last year's $27.5 \%$ reduction. Underlying this outturn, residential mortgages decreased by $11.8 \%$ to $\$ 21.4$ million, vis-à-vis a $19.7 \%$ drop in 2012, while disbursements for the commercial segment were negligible for the second consecutive year.

Indications are that activity in the domestic market could improve modestly over the near-term, as mortgage commitments for new buildings and repairs-a forward looking indicator-rose in number, by $4.7 \%$ (5) to 111 , and in value, by $52.8 \%$ ( $\$ 8.1$ million) to $\$ 23.3$ million. The improvement was solely in the residential segment, as there were no new commitments for the commercial component, compared to two (2) valued at $\$ 0.4$ million in the preceding year.

In terms of financing, the cost for commercial mortgages firmed by 10 basis points to $8.5 \%$; however, the average rate on the residential component softened by the same magnitude to $8.1 \%$.

## Employment

Based on data from the Department of Statistics' Labour Force Survey, employment conditions were slightly improved in the six months ending November 2013. The jobless rate moved lower by 0.8 of a percentage point to $15.4 \%$, in line with the previous year's contraction, as an additional 2,600 persons became employed. In a sign of improving job prospects, the number of discouraged workers fell by $15.1 \%$ ( 1,205 persons) to 6,765 , boosting the labour force participation rate by one percentage point to $73.7 \%$.

A disaggregation by major job centres showed the unemployment rate for New Providence narrowing by 30 basis points to $15.6 \%$, as payrolls firmed by 1,080 persons and the number of unemployed persons fell by 320 . Similarly, in Grand Bahama, the unemployment rate was modestly lower, by 2.7 percentage points to $16.8 \%$, as an additional 820 persons gained employment and the number of jobless individuals fell by 660 .

## Prices

During the review quarter, domestic prices remained relatively benign, although with some significant variability within the Retail Price Index (RPI), which firmed slightly by 5 basis points to $0.77 \%$. Accelerated average price gains were recorded for alcoholic beverages, tobacco \& narcotics, to $6.20 \%$ from 1.39\%; miscellaneous goods \& services, to $3.30 \%$ from $0.22 \%$ and restaurant \& hotels, to $3.34 \%$ from $0.27 \%$. Similarly, inflation firmed for education, by 2.21 percentage points to $2.93 \%$ and health, by 1.03 percentage points to $2.28 \%$, while average price hikes for communication (1.61\%), recreation \& culture,
(4.55\%), and transportation (1.90\%), represented a reversal from year-earlier respective declines of $5.17 \%$, $1.59 \%$, and $0.74 \%$. These firmings were appreciably countered by contractions in average costs for clothing \& footwear and housing, water, gas, electricity \& other fuels-the largest component in the Index, by $3.75 \%$ and $1.40 \%$, following prior period gains of $0.35 \%$ and $1.77 \%$, respectively. In addition, average price accretions slowed for furnishing, household equipment \& routine maintenance, by 1.5 percentage points to $0.40 \%$ and for food \& non-alcoholic beverages, by 0.7 of a percentage point to 1.26\%.

| Retail Price Index <br> (Annual \% Changes) December |  |  |  |  |  |

| ALL ITEMS | 1000 | 105.6 | 0.7 | 106.4 | 0.8 |

Domestic energy prices posted, on balance, a general downward trajectory over the fourth quarter. The average cost of gasoline was lower by $4.2 \%$ to $\$ 5.17$ per gallon, although diesel prices rose, on average, by 4.1\% to $\$ 5.18$ per gallon. On an annual basis, the average cost of both gasoline and diesel fell, by $5.3 \%$ and $2.0 \%$, respectively. Another important energy cost indicator, the fuel charge levied by the Bahamas Electricity Corporation (BEC), declined by $9.6 \%$ over the three-month period, to 23.66\$ per kilowatt hour (kWh), but advanced on an annualized basis by 10.1\%.

## Money, Credit and Interest Rates

## Overview

Monetary conditions featured growth in both liquidity and external reserves in the fourth quarter, and a continuation of subdued lending, as the weakness in employment conditions, as well as private sector demand, limited opportunities for improvement in credit quality indicators. Despite these trends, overall profitability in the banking sector firmed over the third quarter, reflecting a decline in interest costs.

## LIQUIDITY

Banks' net free cash reserves expanded by $\$ 62.1$ million $(18.0 \%)$ to $\$ 407.4$ million, extending the $\$ 2.4$ million (0.7\%) year-earlier gain, and representing a slightly higher $6.8 \%$ of Bahamian dollar deposit liabilities at end-December, 2013. Correspondingly, the broader surplus liquid assets, which include holdings of Government securities, grew by $\$ 24.5$ million (2.2\%) to $\$ 1,137.7$ million, to exceed the statutory minimum by a higher $115.1 \%$, relative to $99.6 \%$ in 2012.

## Deposits and Money

The contraction in the overall money supply (M3) was higher at $\$ 79.9$ million (1.2\%) from the year-earlier $\$ 36.4$ million ( $0.6 \%$ ), for an outstanding stock of $\$ 6,350.0$ million. In terms of the components, accretions to narrow money ( M 1 ) slackened to $\$ 2.0$ million ( $0.1 \%$ ) from $\$ 65.1$ million (4.3\%) a year-earlier, as the $\$ 4.4$ million ( $0.3 \%$ ) decline in demand deposits, offset the $\$ 6.4$ million (3.1\%) seasonal increase in currency in circulation. Further, the contraction in broad money (M2) accelerated to $\$ 38.6$ million ( $0.6 \%$ ) from $\$ 20.4$ million ( $0.3 \%$ ), as the $\$ 65.1$ million $(1.9 \%)$ decrease in fixed balances overshadowed the $\$ 24.5$ million ( $2.2 \%$ ) rise in savings deposits. Similarly, the falloff in residents' foreign currency balances advanced to $\$ 41.3$ million (13.1\%) from $\$ 16.0$ million (6.9\%), as both private and public sector deposits fell by $\$ 35.0$ million ( $11.9 \%$ ) and $\$ 6.3$ million ( $30.0 \%$ ), respectively.

By category, Bahamian dollar fixed deposits constituted the bulk of the overall money supply, at $52.3 \%$, followed by demand ( $22.5 \%$ ) and savings (17.5\%) balances. Foreign currency deposits and currency in active circulation comprised much smaller portions, at 4.3\% and $3.4 \%$, respectively.

## Domestic Credit

Total domestic credit contracted marginally, by $\$ 1.6$ million, a significant slowdown from the prior year's $\$ 112.2$ million (1.3\%) decrease, when the Government utilized a portion of its external currency financing to repay short-term liabilities. The reduction in the dominant Bahamian dollar component (at $90.6 \%$ of the total), by $\$ 118.4$ million (1.4\%), contrasted with a 116.9 million (16.1\%) surge in foreign currency credit.

From a sectoral perspective, banks' net claim on the Government was relatively unchanged over the review quarter, as foreign currency loan proceeds were utilized to repay Bahamian Dollar debt. In contrast, growth in credit to the rest of the public sector advanced to $\$ 11.5$ million ( $2.4 \%$ ) from $\$ 6.1$ million (1.3\%). Private sector credit weakened further, by $\$ 13.1$ million ( $0.2 \%$ ), following a $\$ 32.5$ million ( $0.5 \%$ ) decline in the corresponding 2012 period-although solely attributed to the foreign currency component. Personal loans, which accounted for the majority (72.9\%) of the outstanding credit, recovered by $\$ 11.9$ million ( $0.2 \%$ ) from a $\$ 12.8$ million ( $0.2 \%$ )
contraction last year. In particular, consumer lending firmed by $\$ 24.7$ million (1.2\%), to negate declines in overdrafts and residential mortgages, of $\$ 10.2$ million (13.1\%) and $\$ 1.7$ million ( $0.1 \%$ ), respectively.

A further breakdown of consumer credit showed that loans for miscellaneous purposes advanced by $\$ 21.3$ million, while smaller gains were recorded for credit cards and land purchases, of $\$ 4.6$ million and $\$ 2.0$ million, respectively. In a partial offset, decreases in lending were registered for debt consolidation ( $\$ 2.5$ million), private car loans ( $\$ 1.1$ million) and home improvement (\$0.9 million).

The remaining private sector loan categories showed net repayments for construction ( $\$ 18.6$ million), professional \& other services ( $\$ 10.8$ million), distribution ( $\$ 4.8$ million), tourism ( $\$ 3.9$ million), fisheries ( $\$ 3.1$ million) and transport ( $\$ 1.9$ million). In contrast, significant growth in lending was posted for private financial institutions ( $\$ 9.4$ million) and manufacturing ( $\$ 2.1$ million), while the other categories recorded gains of under $\$ 2.0$ million.

| Miscellaneous | $5,205.7$ | 73.3 | $5,191.3$ | 72.9 |
| TOTAL | 398.1 | 5.6 | 327.0 | 4.6 |

## Mortgages

According to the latest data reported by banks, insurance companies and the Bahamas Mortgage Corporation, total mortgages outstanding were slightly higher, by $\$ 2.7$ million ( $0.1 \%$ ) to $\$ 3,312.1$ million, although below the previous year's $\$ 4.4$ million ( $0.1 \%$ ) gain. The commercial segment was up by $\$ 2.4$ million (1.2\%), to reverse the year-earlier $\$ 7.0$ million ( $3.4 \%$ ) contraction, while residential mortgages-at $93.8 \%$ of the totalstabilized at $\$ 3,106.5$ million, relative to a $\$ 11.4$ million (0.4\%) gain in 2012. At end-2013, commercial banks held the majority of mortgages outstanding, at $89.0 \%$, with the shares of insurance companies and the Bahamas Mortgage Corporation at $5.9 \%$ and $5.1 \%$, respectively.

## The Central Bank

Following an expansion of $\$ 37.7$ million (10.5\%) in the final quarter of 2012, the Bank's net claims on the Government declined by $\$ 34.5$ million ( $6.6 \%$ ) to $\$ 489.9$ million, underpinned by a reduction in Government paper. Similarly, lower deposit holdings led to a contraction in the Bank's net liabilities to the public corporations, by $\$ 11.9$ million ( $66.2 \%$ ) to $\$ 6.1$ million, to contrast with a year-earlier $\$ 4.3$ million (89.9\%) gain. As commercial
banks acquired more Government securities, the Bank's liabilities to this sector decreased by $\$ 16.3$ million (2.5\%) to $\$ 646.9$ million, behind last year's $\$ 87.9$ million (14.8\%) growth.

Supported by net proceeds from the Government's foreign currency loans, external reserves increased by $\$ 72.4$ million ( $10.8 \%$ ) to $\$ 741.6$ million, extending the prior year's gain of $\$ 64.3$ million ( $8.6 \%$ ). In the underlying foreign currency transactions, the Bank's net sale to public corporations was markedly higher at $\$ 142.2$ million, from $\$ 113.7$ million a year earlier, primarily explained by a boost in scheduled debt service payments; and the net sale to commercial banks was approximately doubled to $\$ 70.3$ million. In contrast, the net purchase from the Government advanced to $\$ 248.0$ million from $\$ 208.6$ million.

At end-December, the stock of external reserves was equivalent to an estimated 15.7 weeks of non-oil merchandise imports, relative to 16.0 weeks at end-2012. After adjusting for the $50 \%$ statutory requirement on the Bank's Bahamian dollar liabilities, "useable" reserves fell by $\$ 70.9$ million to $\$ 277.1$ million.

## Domestic Banks

The contraction in banks' private sector credit was lowered to $\$ 13.1$ million ( $0.2 \%$ ), from $\$ 32.5$ million ( $0.5 \%$ ) in 2012, whereas domestic foreign currency borrowings elevated the net claim on the Government, by $\$ 34.6$ million (2.4\%), in contrast to a $\$ 123.4$ million (9.3\%) external borrowing-led reduction last year. The expansion in credit to the rest of the public sector broadened to $\$ 11.5$ million ( $2.4 \%$ ) from 2012's $\$ 6.3$ million (1.4\%).

In terms of deposits, banks' liabilities to the private sector fell further, by $\$ 50.3$ million ( $0.9 \%$ ) to $\$ 5,745.2$ million, relative to last year's $\$ 40.5$ million ( $0.7 \%$ ) contraction. The majority ( $95.5 \%$ ) of deposit liabilities were denominated in Bahamian currency, with private individuals accounting for the largest share ( $54.2 \%$ ), followed by business firms (31.5\%), the public sector ( $5.3 \%$ ), private financial institutions (4.2\%), other entities (3.9\%) and public financial institutions (0.9\%).

By contractual obligations, fixed deposits comprised the bulk ( $56.2 \%$ ) of banks' deposit liabilities, followed by demand and saving balances, with shares at $25.2 \%$ and $18.6 \%$, respectively. Analyzed by range of value and number of accounts, some $88.9 \%$ of Bahamian dollar deposits held balances of less than $\$ 10,000$, and represented $5.9 \%$ of the total value. Balances between $\$ 10,000$ and $\$ 50,000$ constituted $7.3 \%$ of the aggregate number and $10.7 \%$ of the overall value, while those exceeding $\$ 50,000$ made up the smallest proportion of the total (3.8\%) but the dominant value share, at $83.4 \%$.

## Credit Quality

Commercial banks' credit quality indicators deteriorated during the review quarter, amid the persistence of subdued domestic economic conditions and limited scope for improvement in employment, which impacts debt servicing activities. Compared to the previous quarter, total private sector loan arrears expanded by $\$ 25.7$ million (1.9\%) and by $\$ 101.7$ million (8.1\%) over the same period last year, to $\$ 1,352.2$ million. As a result, the ratio of arrears to total loans firmed by 42 basis points relative to the previous quarter and by 1.9 percentage points vis-à-vis December 2012, to $21.9 \%$.

The rise in total delinquencies over the quarter was led by a $\$ 32.4$ million (4.6\%) increase in the mortgage segment, to $\$ 730.9$ million, and the ratio to total loans firmed by 1.1 percentage points, on a quarterly and by 0.96 percentage points an annual basis, to $23.6 \%$. Consumer arrears also advanced, by $\$ 14.4$ million (5.7\%) to $\$ 267.4$ million, which corresponded to quarterly and annual increments of 65 and 50 basis points, to $12.9 \%$ of total loans. In contrast, the commercial component decreased by $\$ 21.1$ million ( $5.6 \%$ ) to $\$ 353.9$ million, and the associated loan ratio narrowed significantly over both time horizons, to $35.6 \%$.

Based on average age of loan arrears, the shortterm (31-90 day) component rose by $\$ 13.1$ million (3.5\%) to $\$ 386.2$ million over the three-month period, and to a higher $6.3 \%$ of total loans. Similarly, non-performing loans-those in excess of 90 days and on which banks ceased accruing interest-grew by $\$ 12.6$ million (1.3\%) to $\$ 966.0$ million-for $15.7 \%$ of total loans.

## Loan Arrears \& Non-Performing Balances

Given the sustained deterioration in credit quality, commercial banks maintained their conservative posture, augmenting bad debt provisions by $\$ 19.4$ million (4.6\%) to $\$ 442.7$ million. As a consequence, the ratio of provisions to total loans trended upwards by 39 basis points to $7.0 \%$, and the ratio of provisions to both arrears and nonperforming loans firmed by 80 basis points and 1.4 percentage points, to $32.7 \%$ and $45.8 \%$, respectively.

## Bank Profitability

During the third quarter of 2013-the latest available data-banks' profitability improved by $\$ 13.7$ million (46.1\%) to $\$ 43.3$ million. This represented a turnaround from a year-earlier $\$ 3.9$ million (11.5\%) contraction, and was attributed to lower interest expense and bad debt provisioning.

Reflecting a general widening of the spread between lending and deposit rates, the interest margin grew by $3.0 \%$ ( $\$ 3.9$ million) to $\$ 131.4$ million, as interest expenses declined by $18.5 \%$ ( $\$ 6.6$ million) and outpaced the $1.7 \%$ ( $\$ 2.7$ million) falloff in interest income. Together with a slight increase in income from commission and foreign
exchange fees, to $\$ 5.9$ million, the gross earnings margin firmed by $3.0 \%$ ( $\$ 4.0$ million) to $\$ 137.2$ million.

Total operational expenses rose by $\$ 12.2$ million (16.3\%) to $\$ 87.4$ million, reflecting higher respective outlays for "miscellaneous" operating and staffing costs, of $32.8 \%$ ( $\$ 8.8$ million) and $10.9 \%$ ( $\$ 4.4$ million), which outstripped the $11.4 \%$ ( $\$ 0.9$ million) decrease in occupancy expenditures. As a result, the net earnings margin fell by $\$ 8.3$ million ( $14.2 \%$ ) to $\$ 49.9$ million. In contrast, losses on non-core activities were reduced by more than one-fourth, to $\$ 6.6$ million, as an almost $50 \%$ reduction in bad debt provisioning eclipsed the $\$ 1.4$ million (45.9\%) rise in depreciation costs.

In line with these trends, banks' corresponding profitability ratios generally improved relative to average domestic assets. The interest margin ratio advanced by 13 basis points to $5.41 \%$, while the commission \& foreign exchange income ratio stabilized at $0.24 \%$, resulting in an overall 14 basis point rise in the gross earning margin ratio to $5.65 \%$. In contrast, a 49 basis point increase in the operational cost ratio, to $3.59 \%$, engendered a 35 basis point decline in the net earnings margin ratio, to $2.05 \%$, and a significant reduction in net losses from noncore activities elevated the net income ratio by 56 basis points to $1.78 \%$.

## Interest Rates

Over the fourth quarter, commercial banks' weighted average interest rate spread widened by 33 basis points to 9.93 percentage points, as the average deposit rate fell by 25 basis points to $1.43 \%$, and the corresponding lending rate firmed by 8 basis points to $11.36 \%$.

In line with the general downward long-term trend in deposit rates, amid the persistence of robust levels of bank liquidity, the average range of interest earned on fixed balances softened, to $0.97 \%-1.92 \%$ from 1.21\% $2.12 \%$ in the prior quarter. In addition, the average rate offered on demand balances was relatively stable at $0.3 \%$; however, the average rate on savings deposits rose by 7 basis points to $0.94 \%$.

On the lending side, the average rate on overdrafts and consumer loans narrowed by 69 and 27 basis points, to $9.02 \%$ and $13.63 \%$, respectively. In contrast, the average commercial mortgage rate firmed by 41 basis
points at $8.81 \%$, and residential mortgage interest costs increased by 10 basis points to $7.26 \%$.

| Banking Sector Interest Rates <br> Period Average (\%) |  |  |  |
| :---: | :---: | :---: | :---: |
|  | $\begin{aligned} & \text { Qtr. IV } \\ & \mathbf{2 0 1 2} \end{aligned}$ | $\begin{gathered} \hline \text { Qtr. III } \\ 2013 \end{gathered}$ | $\begin{gathered} \hline \text { Qtr. IV } \\ 2013 \end{gathered}$ |
| Deposit Rates |  |  |  |
| Demand Deposits | 0.33 | 0.32 | 0.30 |
| Savings Deposits | 1.25 | 0.87 | 0.94 |
| Fixed Deposits |  |  |  |
| Up to 3 months | 1.44 | 1.44 | 1.12 |
| Up to 6 months | 1.72 | 1.21 | 0.97 |
| Up to 12 months | 2.30 | 2.07 | 1.87 |
| Over 12 months | 2.58 | 2.12 | 1.92 |
| Weighted Avg Deposit Rate | 1.83 | 1.68 | 1.43 |
| Lending Rates |  |  |  |
| Residential mortgages | 7.40 | 7.16 | 7.26 |
| Commercial mortgages | 8.40 | 8.40 | 8.81 |
| Consumer loans | 13.66 | 13.90 | 13.63 |
| Other Local Loans | 8.29 | 6.99 | 7.86 |
| Overdrafts | 9.36 | 9.71 | 9.02 |
| Weighted Avg Loan Rate | 11.10 | 11.28 | 11.36 |

In terms of other benchmark interest rates, the average Treasury bill rate advanced by 19 basis points to $0.46 \%$, while the Central Bank's Discount Rate and commercial banks' Prime Rate remained at $4.50 \%$ and $4.75 \%$, respectively.

## Capital markets Developments

In the context of the mildly positive domestic economic momentum, the volume of shares traded on the Bahamas International Stock Exchange (BISX) doubled to 1.4 million from 0.7 million in the same quarter a year earlier, when trading volumes fell by $19.0 \%$. As a consequence, the value of trades firmed by $53.0 \%$ to $\$ 5.7$ billion, relative to a $26.1 \%$ decline in 2012. Market capitalization increased by $5.6 \%$ to $\$ 3.0$ billion, following last year's $0.5 \%$ decline, owing to broad-based gains in share prices. At end-December, the number of securities listed on the exchange was unchanged, at 27.

## International Trade and Payments

Provisional estimates for the fourth quarter of 2013 signaled a deterioration in the current account deficit, by $\$ 130.8$ million (29.9\%) to $\$ 568.8$ million, vis-à-vis the comparative 2012 period, as the merchandise trade deficit widened, and the services account surplus narrowed under the impact of higher outflows for construction services and lower tourism inflows. The estimated surplus on the capital and financial account declined slightly by $\$ 0.9$ million ( $0.2 \%$ ) to $\$ 404.2$ million, as lower net foreign direct investment inflows were substantially countered by higher external loan financing receipts.

The estimated merchandise trade deficit rose by $\$ 14.3$ million ( $2.5 \%$ ) to $\$ 584.7$ million, as the $\$ 61.8$ million (24.3\%) contraction in exports to $\$ 201.8$ million, outweighed the decline in imports, by $\$ 47.5$ million (5.7\%) to $\$ 786.6$ million. In terms of components, while net non-oil merchandise imports expanded by $\$ 23.0$ million (5.0\%) to $\$ 481.3$ million, oil imports fell by $\$ 66.8$ million (27.6\%) to $\$ 175.2$ million, due to both lower oil import volumes and average prices. Specifically, the average price per barrel decreased for jet fuel, by $16.3 \%$ to $\$ 133.19$; for gas oil, by $9.6 \%$ to $\$ 114.92$; aviation gas, by $8.7 \%$ to $\$ 82.20$ and motor gas, by $6.1 \%$ to $\$ 119.11$. In contrast, the average cost of propane increased, by $36.6 \%$ to $\$ 76.74$ per barrel.

The estimated surplus on the services account narrowed by $\$ 68.5$ million ( $36.4 \%$ ) to $\$ 119.5$ millioninclusive of a more than two-fold rise in foreign invest-ment-related construction services outflows, to $\$ 131.9$ million. Amid the ongoing weakness in stopover arrivals, travel receipts contracted by $\$ 19.6$ million (5.0\%) to $\$ 369.6$ million, while net outflows related to transportation and insurance services grew marginally by $\$ 1.9$ million $(3.4 \%)$ to $\$ 56.8$ million and by $\$ 0.5$ million (1.2\%) to $\$ 45.9$ million, respectively. Providing some offset, net inflows from offshore companies' local expenses rose by $\$ 11.7$ million (26.6\%) to $\$ 55.9$ million and Government's net service receipts were marginally higher at $\$ 6.0$ million. The net outflow for other "miscellaneous" services fell by $\$ 10.4$ million ( $12.4 \%$ ) to $\$ 73.4$ million, and net royalty \& license fee payments declined by $\$ 2.7$ million (40.2\%) to $\$ 4.0$ million.

The deficit on the income account widened by $\$ 38.0$ million (67.3\%) to $\$ 94.6$ million, owing mainly to an almost two-fold increase in net investment outflows to $\$ 91.1$ million. In particular, private sector interest and dividend payments firmed by $\$ 43.0$ million to $\$ 68.7$ million, as accretions to non-bank net outlays accelerated more than two-fold to $\$ 74.7$ million, while commercial bank net receipts fell marginally by $\$ 1.1$ million to $\$ 6.1$ million. In an offset, net labour income remittances were reduced by more than half to $\$ 3.5$ million, and net official outflows were slightly lowered to $\$ 22.4$ million.

Net current transfer payments were reversed, to a $\$ 9.0$ million net outflow from a $\$ 1.0$ million net receipt in 2012, explained by a $\$ 13.7$ million ( $73.1 \%$ ) rise in workers' remittances and a slight $\$ 0.2$ million (7.0\%) increase in other "miscellaneous" net transfer outflows. Conversely, net Government receipts increased by $\$ 4.0$ million (17.4\%) to $\$ 27.3$ million.

The relatively balanced outcome on the capital and financial account reflected the compensating impact of higher project loan financing inflows relative to the decline in direct investment flows. Specifically, net direct investment inflows were lower by $\$ 15.1$ million to $\$ 147.3$ million, primarily explained by a more than halving in inflows from land purchases to $\$ 6.1$ million, while net equity inflows fell modestly by $\$ 2.1$ million to $\$ 141.3$ million. In contrast, other "miscellaneous" net investment inflows expanded by $\$ 14.5$ million to $\$ 273.5$ million, reflecting the extension of short-term US $\$ 125.0$ million in foreign currency loans to the Government, which elevated domestic banks' short-term liabilities by $\$ 164.2$ million, vis-à-vis a net reduction of $\$ 26.2$ million in 2013. In addition, net portfolio outflows were marginally lower at $\$ 14.4$ million, as the build-up in debt securities holdings slowed by one-half to $\$ 6.3$ million, outpacing an almost four-fold growth in net outward equity investments to $\$ 8.2$ million. Other private investments-mainly related to loan financ-ing-advanced by $\$ 29.1$ million to $\$ 106.5$ million. Net public sector inflows; however, contracted sharply to a mere $\$ 2.9$ million, from the year-earlier external loan boost of $\$ 205.1$ million. Owing to higher migrants' remittances, net capital transfers rose by $\$ 0.4$ million (19.7\%) to $\$ 2.2$ million.

As a result of these developments, and after adjusting for net errors and omissions, the surplus on the
overall balance, which corresponds to the change in the Central Bank's external reserves, grew by $\$ 8.1$ million to $\$ 72.4$ million.

## International Economic Developments

Economic indicators suggest that the mild growth path of the global economy was sustained during the fourth quarter, as both the United States and Asian economies continued to expand, while the euro zone showed modest signs of recovery. In this environment, labour markets conditions improved for most major economies, while inflation remained extremely low. In addition, amid increased optimism over the improving economic outlook, all major equity markets registered gains and, with the exception of the US Federal Reserve--which tapered its "quantitative easing" programme, all major central banks retained their highly accommodative monetary policy stance.

Real GDP growth in the United States slowed to an annualized $3.2 \%$ in the fourth quarter, from $4.1 \%$ in the prior three-month period, owing to a decline in private
investment, as well as reductions in Government spending and fixed investments. Buoyed by higher output in the agriculture, production and services industries, real GDP in the United Kingdom grew by $0.7 \%$ in the final quarter, in line with the previous three-month period. Economic conditions also continued to improve in the euro zone, particularly in the southern states, as real output expanded by $0.3 \%$ in the fourth quarter, extending the slight $0.1 \%$ gain in the prior three-month period. Growth in factory output and investment spending fuelled a $7.7 \%$ expansion in Chinese real GDP, in line with the $7.8 \%$ improvement in the third quarter. Further, the Japanese economy continued to recover, as an uptick in consumption and capital spending led to annualized GDP firming by $1.0 \%$, in line with the previous quarter's $1.1 \%$ expansion.

Indications are that labour market conditions continued to improve, with the unemployment rate in the United States narrowing by 30 basis points to $7.0 \%$. Similarly, the jobless rate in the United Kingdom decreased by 40 basis points to $7.2 \%$, owing to a 125,000 reduction in the number of unemployed persons, while the rate softened in the euro zone, by 20 basis points to $12.0 \%$ quarter-onquarter. In Asia, the unemployment rate steadied at 4.1\% for China, and moderated by 20 basis points to $3.7 \%$ for Japan.

Inflation remained relatively subdued over the review period. Annual consumer price inflation in the United States advanced by 30 basis points over the quarter to $1.5 \%$ at end-December, underpinned by increases in energy, housing and food costs. In contrast, annual inflation in the United Kingdom softened by 10 basis points to $2.0 \%$, owing to decreases in prices for food \& non-alcoholic beverages and recreational goods \& services. Lower prices for telecommunications and fuels for transport resulted in euro zone annual inflation narrowing, by 10 basis points to $0.8 \%$. In the Asian economies, China's year-on-year consumer price inflation decreased to $2.5 \%$ in December, from $3.1 \%$ in September, while average prices in Japan firmed by $1.6 \%$ during the year, compared to a slight $0.1 \%$ decrease in the prior period.

In the foreign currency markets, the United States dollar depreciated against most of the major currencies, as investors increased their appetite for "riskier" assets. The dollar registered declines against all of the major

European currencies, retreating in relation to the British Pound, by $2.2 \%$ to $£ 0.60$; the euro, by $1.6 \%$ to $€ 0.73$ and the Swiss Franc, by $1.4 \%$ to CHF0.89. The dollar also depreciated by $1.1 \%$ vis-à-vis the Chinese Yuan to CNY6.06, but appreciated against the Japanese Yen and Canadian dollar, by $7.2 \%$ to $¥ 105.31$ and by $3.0 \%$ to CAD $\$ 1.06$, respectively.

Most of the major equity markets registered broadbased gains over the review quarter, buoyed by the Federal Reserve's decision to scale back its stimulus measures. In the United States, the S\&P 500 and the Dow Jones Industrial Average (DIJA) surged by $9.9 \%$ and $9.6 \%$, respectively. Gains were also recorded in Europe, led by an $11.1 \%$ rise in German's DAX, with the United Kingdom's FTSE and France's CAC 40 higher by $4.4 \%$, and $3.7 \%$, respectively. Developments in the Asian markets were mixed, as Japan's Nikkei 225 advanced by 12.7\%; however, China's SE Composite weakened by $2.7 \%$, amid concerns over the state of the financial sector.

The combination of positive economic developments and heightened fuel demand, amid the severe cold weather conditions in the Northern hemisphere, largely explained the $2.4 \%$ rise in crude oil prices to US $\$ 111.59$ per barrel in the fourth quarter of 2013. In terms of precious metals, gold prices fell by $9.6 \%$ to $\$ 1,201.64$ per ounce at end-December, while the cost of silver was reduced by $10.3 \%$ to $\$ 19.47$ per ounce.

In monetary policy developments, improving growth fundamentals led the Federal Reserve to announce a retrenchment of its $\$ 85$ billion per month bond buying programme by $\$ 10$ billion in January 2014, while retaining its key interest rate within the $0.00 \%-0.25 \%$ range. The Bank of England kept its benchmark interest rate at 0.5\% and maintained the stock of Government debt asset purchases at $£ 375$ billion; however, the low inflationary environment, and significant excess capacity prompted the European Central Bank to reduce its key interest rates, by 25 basis points. To provide further stimulus to the economy and achieve its $2.0 \%$ inflation target, the Bank of Japan continued its $¥ 50$ trillion asset purchase programme and held its uncollateralized overnight call rate within the $0.0 \%-0.1 \%$ range. The People's Bank of China also sustained its highly accommodative policy
stance, and injected an additional US\$5.0 billion into its banking system to ease tightening credit conditions.

Developments in the external sector of the major economies were mixed, with the trade deficit in the United States narrowing by $\$ 8.0$ billion to $\$ 112.0$ billion over the September quarter, benefitting from a $1.8 \%$ rise in exports, which outweighed the $0.4 \%$ increase in imports. In the United Kingdom, a reduction in net imports secured an improvement in the trade deficit, by $21.3 \%$ to $£ 8.0$ billion in the fourth quarter, while the euro zone's trade surplus surged by $29.1 \%$ to $€ 47.5$ billion, occasioned by growth in net exports. In Asia, China's trade surplus widened by $47.1 \%$ to US $\$ 90.6$ billion, as the expansion in exports overshadowed import gains. In contrast, Japan's trade deficit deteriorated by $26.0 \%$ ( $¥ 763.5$ billion) to $¥ 3,698.6$ billion, mainly associated with a $5.6 \%$ increase in fuel-related imports.
